

What is a flex-fuel vehicle?

Flex-fuel vehicles, commonly called FFVs, are cars engineered to run on any ethanol/gasoline blend. FFVs allow the drivers, when available, to choose their fuel blend such as E20, E30, E50 up to E85. Drivers choose higher blends for a number of different reasons: price, cleaner burning fuel, and to support American jobs and American-made products.

Benefits of FFVs & Ethanol Blends

Ethanol can help lower the price of a gallon of fuel.

Ethanol increases horsepower and octane.

Ethanol reduces engine knocking and pinging.

Ethanol helps keep your engine clean by reducing fuel injection system build up.

American Ethanol increases our country's energy independence and strengthens our economic and national security by keeping American dollars at home rather than sending them to oil-rich countries in the Middle East and elsewhere around the globe.

Ethanol helps prevent gas line freeze in the winter.

Ethanol burns cleaner, reducing greenhouse gas emissions by as much as 50%.

American Ethanol supports over 386,500 jobs across the economy, jobs that cannot be outsourced.

FFVs on the Road Today

There are more than 16 million FFVs on the roads today: including compacts, sedans, minivans, trucks and SUVs. American automakers are currently producing 50% of all new vehicles model year 2012 and beyond flex-fuel capable.

Before you fill your tank with a flex-fuel blend, make sure you have a FFV.

- Check your fuel door
- Look for an exterior FFV badge
- Look for a yellow gas cap
- Consult your owner's manual

Finding an ethanol blend

There are approximately 3,200 retail stations offering these ethanol blends across the country. There's probably one closer than you realize. Visit our website to find the station nearest you. You can also use your Garmin or TomTom GPS system, iPhone, iPad, Blackberry, or Android smartphone.

If you don't own a FFV, you should consider one when you purchase your next vehicle. However, you can still use ethanol. You can use E10 in all vehicles and E15 in all vehicles model year 2001 and newer.
